## Shade Cloth

Woven polypropylene shade cloth is now available in eight different shade percentages with a variety of finishing options. Shade cloth is an excellent choice for greenhouses, patios, and open sidewall barns to introduce additional shade.

### Features

- Heavier and more durable than knitted shade cloth
- UV stabilized for the most extreme solar conditions
- 8 shade percentages to choose from: 30, 55, 63, 73, 78, 80, 95, 100%
- Edge finishing options include grommets and pocket hems to fit any installation
- Standard reinforced taped edge is single stitched. All other edges use extra wide reinforced tape edge with durable double row stitching.
- Provides additional cooling by introducing shade in your greenhouse, patio or open sidewall barn
- Helps to reduce UV-penetration
- Reduces dust particles and damage from wind and hail
- Protects vegetables and plants from sun scorch
- Deters birds and insects
- Rot and mildew resistant
- Water permeable for rain, sprinklers and irrigation systems
- See Curtain System section for the complete line of accessory items

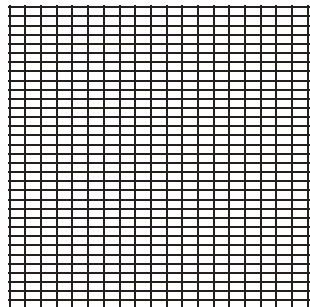

**8  
shade options  
to meet your  
specific need!**

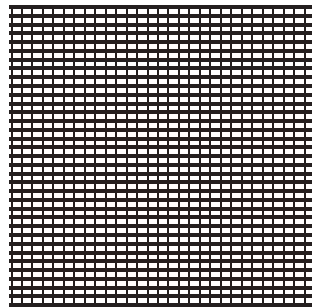

### Applications

- Livestock (indoor and outdoor)
- Poultry houses
- Retail nurseries and garden centers
- Plants and vegetables
- Patios, decks and gazebos
- Dog kennels
- Sports and recreation areas
